Toelichting

Algemeen

Achtergrond Regio Deal Natuurinclusieve Landbouw

Binnen de Regio Deal Natuurinclusieve Landbouw Noord-Nederland werken het Rijk en de provincies Drenthe, Fryslân en Groningen samen met andere organisaties aan een gezamenlijke ambitie om een duurzame, natuurinclusieve landbouw in Noord-Nederland te realiseren. Het doel is om met een gebiedsgerichte aanpak een structurele benadering voor natuurinclusieve landbouw te ontwikkelen, te toetsen en toepasbaar te maken op basis van ecologische en landbouwkundige kennis, en kennis over gebiedsparticipatie en verdienmodellen. Hiervoor is de subsidieregeling Regio Deal Natuurinclusieve Landbouw Noord-Nederland opgesteld. In deze subsidieregeling zijn algemene subsidievoorwaarden opgenomen. (o.a. voorwaarden over de verdeelsystematiek, niet subsidiabele kosten en weigeringsgronden). Zoals in de subsidieregeling Regio Deal Natuurinclusieve Landbouw Noord-Nederland is opgenomen stellen Gedeputeerde Staten per gebied nadere regels vast. Voor de gebieden die vallen binnen de doelgroep van de regeling gelden onder andere ook de algemene subsidievoorwaarden van de Procedureregeling subsidies provincie Groningen 2018 en de subsidievoorwaarden van de subsidieregeling Regio Deal Natuurinclusieve Landbouw Noord-Nederland.

Artikelsgewijze toelichting

Artikel 3 Subsidiabele activiteiten

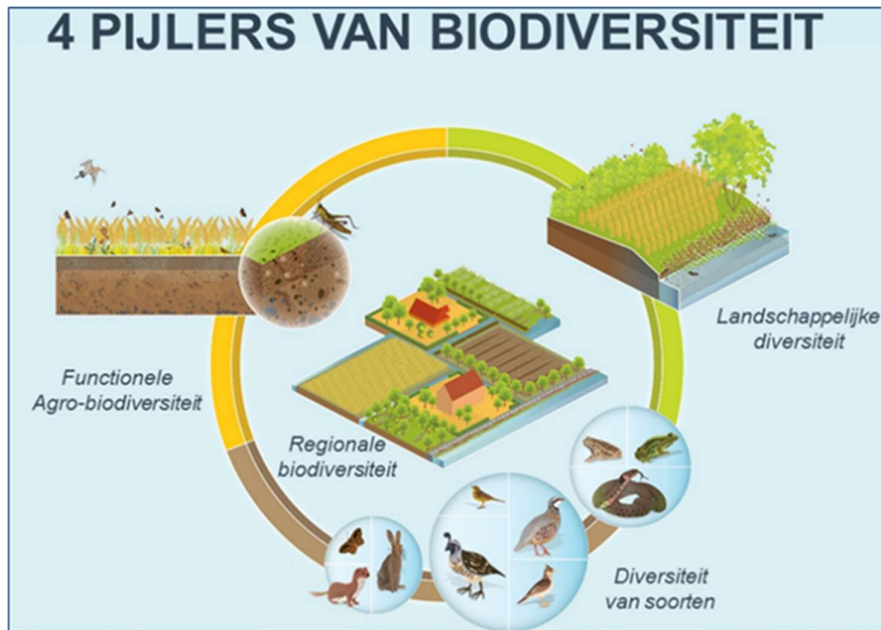

Lid 1 sub c en lid 2 sub e: vier pijlers biodiversiteit

In dit artikel wordt verwezen naar de vier pijlers van biodiversiteit. Onder deze pijlers wordt het volgende verstaan¹:

1. Functionele agrobiodiversiteit: natuurlijke processen van planten en dieren die een positief effect hebben op landbouwproductie, zoals bestuiving door bijen, regenwormen die de bodem luchtig maken of micro-organismen die de bodemgezondheid verbeteren.
2. Landschappelijke diversiteit: landschapselementen zoals hagen, veldstruweel, sloten en bermen brengen diversiteit in de fysieke omgeving. Deze landschappelijke diversiteit verstrekt en ondersteunt de (functionele agro-) biodiversiteit.
3. Regionale biodiversiteit: koppeling van gebieden en processen op gebiedsniveau ondersteunt regionaal specifieke soorten en/of ecologische processen.
4. Diversiteit van soorten: het agrarisch landschap is een belangrijk habitat voor specifieke soorten flora en fauna. Gericht beheer behoudt en versterkt dit habitat.

De vier pijlers van biodiversiteit zijn in onderstaande figuur, in onderlinge samenhang, weergegeven (bron: Louis Bolk Instituut 2019):

¹ Louis Bolk Instituut, 2019

Op basis van lid 1 sub c dient minimaal aan één van de hierboven genoemde pijlers voldaan te worden om voor subsidie in aanmerking te komen. Als het project niet bijdraagt aan één van de vier pijlers van biodiversiteit komt het project niet voor subsidie in aanmerking.

Verder dient het project bij te dragen aan twee van de criteria die in lid 2 genoemd zijn. Eén van de daar genoemde criteria is dat het project in hoge mate bijdraagt aan twee van de vier pijlers van biodiversiteit. Indien hier niet aan wordt voldaan, kan een project, onverminderd het bepaalde in lid 1 sub b, subsidie krijgen als het voldoet aan twee van de andere genoemde criteria.

Artikel 7 Subsidiehoogte

De daadwerkelijke subsidiehoogte is afhankelijk van de omvang van de subsidiabele kosten en van het vrijstellingsregime waaronder de subsidie wordt verstrekt. Het subsidiebedrag is maximaal € 25.000,--. De subsidiabele kosten dienen minimaal € 5.000,-- te bedragen. Het uitgangspunt is dat het subsidiepercentage 100 is, oftewel dat over 100% van de subsidiabele kosten subsidie kan worden verkregen, voor zover de subsidiabele kosten minder dan € 25.000,-- bedragen. Als de subsidiabele kosten hoger dan € 25.000 zijn, wordt maximaal € 25.000 aan subsidie verstrekt.

Indien een subsidie op grond van Algemene Groepsvrijstellingsverordening (AGVV), artikel 25, wordt verstrekt, gelden lagere steunpercentages. Deze (maximale) percentages zijn vastgelegd in de AGVV. In het aanvraagformulier dienen de aanvragers aan te geven op grond waarvan een subsidie aangevraagd wordt. Indien een subsidie op grond van een de-minimisverordening (landbouw de-minimis of de-minimis regulier) een subsidie aangevraagd wordt, dienen de aanvragers een de-minimisverklaring te overhandigen. De ruimte die de ondernemers nog hebben op basis van de de-minimisverordeningen kan ook invloed hebben op het maximale subsidiebedrag.
